

Built to Perform. Built to Last.

For over 120 years, Ward Leonard has been developing innovative power generation technologies that enable our customers to increase performance, productivity and uptime in the world's most demanding environments. Today, we are pleased to offer solutions that include:

Diesel Generators

Quality, reliability, knowledge and support make Ward Leonard Generator Sets a superior solution for your backup and prime power generator needs. Ranging from 10 - 500 kVA (1500/1800 rpm) PRP rating, our products come equipped with an efficient combustion system that enables high power output with lower fuel consumption and noise.

WLG Series – Diesel Engines for Gensets

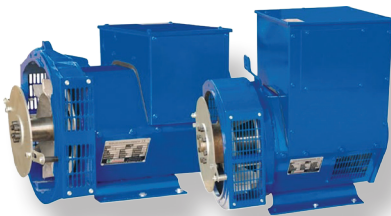

The WLG 3-, 4- and 6-Cylinder Series are highly efficient and durable diesel engines suitable for Gensets. These compact, quiet engines combine outstanding value and flexibility with excellent performance for long lasting reliability in harsh environments.

Auto Mains (Utility) Control Module

Ward Leonard Gensets utilize DeepSea DSE 6020 MKII Auto Mains (Utility) Failure Control Modules that provide a wide range of operating and monitoring features for single diesel and gas Gensets.

<u>Overall Size</u>	<u>Panel Cutout Size</u>	<u>Max Panel Thickness</u>	<u>Weight</u>
216 x 158 x 43 mm (8.5" x 6.2" x 1.5")	184 x 137 mm (7.2" x 5.3")	8.0 mm (0.3")	0.48kg

WLP / WLS Genset Alternators

Ward Leonard Gensets are equipped with STAMFORD® alternators, available in five category sizes. Alternators include 2-, 4- and 6-pole options at low, medium and high voltages. Other alternators are made available upon request.

<u>P0/P1 Range</u>	<u>UC Range</u>	<u>HC Range</u>	<u>P7 Range</u>	<u>P80 Range</u>
7.5 - 42.5 kVA	40 - 250 kVA	250 - 1400 kVA	1260 - 2750 kVA	2000 - 5370 kVA
