

Engineered for Extreme Environments

Ruggedized Motors, Controls and Drives for the World's Most Demanding Mining and Material Handling Applications

No matter where you are – from open pits to underground – Ward Leonard delivers products and integrated solutions that can **withstand shock, vibration, heat and dust** in the harshest environments.

Our comprehensive product range covers an array of mining and material handling applications, from **elevators to ventilation systems and production equipment**. We also provide custom systems integration expertise and shoulder-to-shoulder technical support to ensure your operation is running at peak productivity and efficiency.

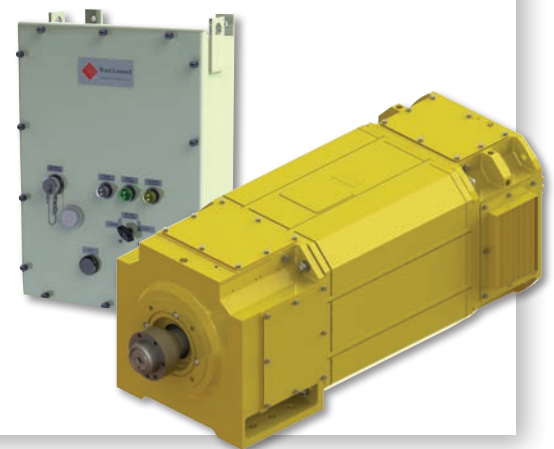

When you need military-grade solutions that are built to last for decades, contact Ward Leonard. Our team of engineers is on-call to help with any product or application need. Just visit www.wardleonard.com.

About Ward Leonard

For more than 120 years, Ward Leonard has developed highly engineered solutions that have harnessed power for complex, technical and mission-critical applications in severe environments. From subterranean mining operations and oil rigs in the Arctic, to deep sea nuclear submarines and high capacity power plants, we're everywhere there is a challenge.

Products:

- ◆ AC Induction Motors
- ◆ Motor Drives
- ◆ Control Devices
- ◆ Electromechanical & Electronic
- ◆ ATEX & X/P Certified Equipment

Applications:

- ◆ Exploration
- ◆ Process
- ◆ Transportation
- ◆ Power Distribution
- ◆ Electrical Monitoring
- ◆ Specialty Design
