

Predictive Maintenance Programs

Proven Solutions to Reduce Failures & High Downtime Costs

Downtime isn't an "if it happens" situation—it's a "when it happens" event. You deal with it every day because that's the nature of machines and technology.

What if you could **reduce unexpected downtime and its exorbitant costs**, and instead plan ahead to optimize your equipment for peak performance? You would save a lot of time, effort and donations to the swear jar.

That's what **Ward Leonard Predictive Maintenance Programs** do for you. Much more than 6-point fault zone testing, our solutions also enable you to:

- ◆ Determine the health of your motors, generators & pumps
- ◆ Understand where your equipment is in its life cycle
- ◆ Restore or replace anything before it breaks
- ◆ Plan for service when it best fits your schedule
- ◆ Reallocate downtime & reactive repair costs to other projects

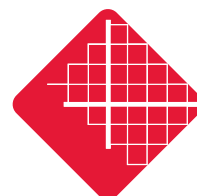

Ward Leonard Predictive Maintenance Programs Offer:

- ◆ Strategic planning
- ◆ Baseline equipment testing
- ◆ 6-point fault zone / PdMA testing
- ◆ Vibration analysis
- ◆ Thermal imaging
- ◆ Voltage regulator testing
- ◆ Diagnostics, analytics & reporting
- ◆ Recommendations for optimization & budgeting
- ◆ 24/7 on-site field service & in-shop capabilities
- ◆ Use of state-of-the-art technologies
- ◆ Climate controlled storage for fast equipment replacement
- ◆ Spare / replacement parts sales

Predictive Maintenance is just one component of Ward Leonard **MotorCare™** and **GeneratorCare™** – the industry's only dedicated programs proven to increase productivity and reduce downtime. Ask your salesperson for more information.
